THIS IS THE WAY TO PRODUCE PROFITABLE TURKEYS THAT ARE MONEY MAKERS

- 1.** Buy good healthy poults of good strain.
- 2.** Use the best possible equipment.
- 3.** Exercise good common sense management.
- 4.** Use the most economical feeds which are blue Seal.
 - a. Feed Blue Seal Turkey Mash for 10 week period which gives your poults a good start by building a good sturdy body and bone system.
 - b. Feed Blue Seal Grower for an 8 week period to further develop the framework of the bird.
 - c. Lastly, feed Blue Seal Balancer with grain to top the bird off and you will make money and produce a bird like one shown in this picture.

Poultry Service

This Service sponsored and introduced by your Company over five years ago under the able guidance of "Doc" Nordhausen has done more than any other one thing to save and make profits for the poultry farmer. Doc's advice is timely and profitable on livestock problems. This service is free to all. Call your warehouse when in trouble.

Lake-Cook Farm Supply Co.

Victory Is Our Goal

Our Country, with a year of war back of it, has made wonderful strides and "all-out" production for ships, airplanes, guns, ammunition, and farm products have been pretty well met.

One of the most important in defense for war is that of food and which at this writing is lagging somewhat behind. Behind all foods must first come the seeds, then the growing under proper management and cultivation.

SEEDS

Seeds are of the most importance in this process as the best producing and quality varieties should be used especially during this emergency. Your Company, with this sole thought in mind has given "overall" attention in carrying in stock for your needs the best and most needed varieties. We strongly advise you as a Farm Bureau member and patron of this Company to purchase your seeds from your own Company whose interest is your interest and the interest of our great Country.

FIELD SEEDS

GRIMM ALFALFAS — the Northwest variety should be used in this district. These are very hearty and do well here. However, the high quality Grimms are short this season and prices much higher. It appears at this writing that we will have nearly enough to take care of all patrons but you must act at once for good quality seeds.

BLUE TAG GRIMM — the choice off all Alfalfas. State certification as to origin, branch root system, winter kill resistant, high in germination and purity. Seed is scarce.

SWEET CLOVER — White and Yellow Blossom. One of the greatest soil builders, low in price high in purity and germination.

MEDIUM RED CLOVER — One of the most useful legume crops in use. Ranks next to Alfalfa in feeding value. Prices are somewhat higher.

ALSIKE CLOVER — Finer and more leafier than Red Clover, producing a good crop of hay. Good for low lands. Higher in price.

TIMOTHY — Fine quality seed. Low in price. We have every available seed for your needs consisting of: Sudan - Brome - Red Top - Blue Grass - Rape - Millet - Atlas Sorgo - and many others.

FERTILIZER

Fertilizers, especially the formulas containing Nitrogen will be controlled as to the crops you can use them on.

Being a farm Company, we are in a fine position to assist you in getting what you need.

We represent Swift, Koos, and our own Blue Seal. You should purchase your fertilizer early. See us for your requirements.

Your Company paid 7½% patronage on fertilizer last year.

SEED GRAINS

Progress Wheat — a high quality rustless bearded wheat; a hardy spring wheat; one of the highest yielders.

Sturgeon Wheat — Resistant to rust, very hardy and a good bread maker.

Oats — different varieties of high quality seed oats, adapted for this district.

Barley — Wisconsin No. 38 — a high yielder and very stiff straw; one of the highest quality barleys — high germination and purity.

We carry all other seed grains — see us for prices.

BUSH BEANS—Green Pod

	lb.	pk.	bu.
	1	15	60
BLACK VALENTINE (48 days)35	3.00	10.00
Very hardy. Pods are long and fleshy.			
STRINGLESS GREEN POD (50 days)35	3.00	10.00
The leading round pod variety.			
BOUNTIFUL STRINGLESS (48 days)35	3.00	10.00
A main crop variety with pods 7 to 8 inches in length.			
Very hardy, early and productive.			

WAX BEANS

	1 lb.	pk.	bu.
		15	60
PENCIL POD BLACK WAX (52 days)35	3.25	12.00
The best of the black seeded wax varieties. Pods 6½ to 7 inches. Stringless and of high quality.			
ROUND POD KIDNEY WAX (52 days)35	3.65	13.25
Yellow round meaty pod. Stringless. A good canning variety.			
WARDWELL'S KIDNEY WAX (53 days)35	3.25	12.00
A popular early Gardeners variety. Pods large, 5½ to 6 inches long. Nearly stringless and of good quality.			
UNRIVALED WAX (53 days)35	3.15	11.50
Produces pods about 5 inches in length. Narrow, fairly straight fleshy yellow pods. Strings.			
IMPROVED GOLDEN WAX (50 days)35	3.25	12.00
The most popular of the wax varieties and one of the best.			
Very early and productive. Pods 4 to 4½ inches long.			
Seed white, much mottled brown.			

BUSH LIMA BEANS

	1 lb.	pk.	bu.
		15	60
HENDERSON BUSH LIMA (65 days)35	3.00	10.00
A hardy, very early and small type of lima. Much in favor with canners. Pods small and about 3 inches long.			
FORDHOOK BUSH LIMA (78 days)40	3.50	12.50
Produces a large strong plant growing upright, keeping the pods off of the ground which prevents rot. Pods 4 to 4½ inches, long, containing 3 to 4 beans. Season 75 days.			
BURPEE'S IMPROVED LIMA (76 days)35	3.00	10.00
Both beans and pods larger than old type; average one bean more to the pod; beans larger and thicker than in old form.			

HARDY'S IODIZED SALT

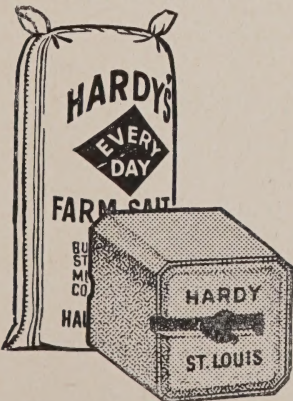

is stabilized!

- **Improve Stock Health**
- **Step Up Production and Profits**

IT'S TRUE that many farm animals today don't get enough iodine in their usual rations . . . and iodine is even more necessary to healthy, profitable livestock than it is to the human diet! Experiments at State Agricultural Stations have proved that adequate amounts of iodine added to rations can increase growth and vitality, step up milk production . . . and result in more profitable cows, calves, lambs, and hogs.

The easiest way to feed iodine is along with the salt your livestock needs — in Hardy's Iodized Salt Blocks. In most iodized blocks the iodine is quickly lost through contact with the air — the iodine cannot escape from Hardy's Iodized Salt Blocks because they are Stabilized! . . . a patented scientific process which seals the iodine into the salt. Hardy Salt Blocks are extra smooth and firm, long lasting and economical. A stake hole and hand holds for moving make Hardy's Blocks easy to handle and use. Made from high grade, clean evaporated Michigan salt, you'll find Hardy's Salt Blocks have what it takes to do the job. Hardy's Iodized Salt also comes in bags. Come in and get our prices.

HARDY SALT COMPANY

800 SO. VANDEVENTER

ST. LOUIS, MO.

OR LAKE-COOK FARM SUPPLY CO.

POLE BEANS—Green Pod

	1 lb.	pk. 15	bu. 60
KENTUCKY WONDER OR OLD HOMESTEAD35	3.15	11.50
Pods are fleshy and green (7 to 10 inches), stringless when young.			

BEETS

	1 lb.	5 lb.	10 lb.
CROSBY'S EGYPTIAN (50 days)	2.00	9.75	19.00
Roots a flattened globe shape, skin dark red, flesh a trifle lighter in color and lightly zoned. Tops small.			
DETROIT DARK RED (53 days)	2.00	9.75	19.00
An early variety. Root globe shaped, slightly tapering. Smooth skin, mahogany red flesh, crisp and sweet. One of the best varieties to store for winter.			

MANGEL

	1 lb.	5 lb.	10 lb.
MAMMOTH LONG RED	1.40	6.60	12.65
The skin is bright red, and the flesh white, with veined rings of rose-pink. Enormously productive.			
GOLDEN TANKARD	1.40	6.60	12.65
Yields enormous crops, very rich in sugar. Skin and flesh deep orange yellow.			

CABBAGE

	oz.	¼ lb.	lb.
COPENHAGEN MARKET (early) (68 days)45	1.50	4.40
Head is Medium in size, round, solid, uniform in shape and maturity, very good quality, (heads average 3½ to 5 pounds).			
ALL SEASONS (yellow resistant) (98 days)45	1.65	4.50
Withstands dry weather. Especially good for kraut.			
MARION MARKET (75 days)55	2.00	5.50
An excellent copenhagen market type but a little later.			
EARLY ALL HEAD YELLOWS RESISTANT (70 days)55	2.00	5.50
Very large flat heads and fairly solid, usually range from 6½ to 7½ lbs. in weight.			
WISCONSIN NO. 8 (yellow resistant) (100 days)50	1.65	4.50
This variety is especially good for storage and tonnage trade. Produces a heavy round head.			
BUGNER'S (100 days)80	2.75	8.25
The leading winter variety for this section of the country. A good keeper.			

SAVOY CABBAGE

	oz.	¼ lb.	lb.
IMPROVED AMERICAN50	1.65	4.50
Forms a hard head and densely curled leaves.			

RED CABBAGE

	oz.	¼ lb.	lb.
MAMMOTH ROCK RED (very late) (95 days)60	2.00	5.50
Head is Medium in size, globular to slightly flattened, very firm and solid, uniform, attractive deep purple color.			
RED RESISTANT (100 days)80	2.50	8.00
Not as large as Mammoth Rock Red, but darker and more uniform.

Prompt Service and Safe Delivery

CARROTS

	$\frac{1}{4}$ lb.	lb.	5 lb.
GREATER CHANTENAY (70 days)	1.35	4.00	18.50
This is a Chantenay which resembles the original type in all respects except that it averages $1\frac{1}{2}$ to 2 inches longer.			
CHANTENAY (60 days)	1.35	4.00	18.50
This is a half long, good medium early variety, with half long stump root, best for early bunching.			
CHANTENAY RED CORE (70 days)	1.35	4.00	18.50
Root is Medium in length (5 to 6 inches, $2\frac{1}{2}$ inches at the shoulder) with square shoulder, tapering slightly, stump-rooted at the bottom, very good quality.			
DANVER'S HALF LONG (80 days)	1.35	4.00	18.50
The best known second early variety. Roots 6 to 8 inches long, tapering to a blunt point; flesh deep orange, tender and good quality.			
NANTES HALF LONG (68 days)	1.75	5.00	24.00
Roots 6 to 8 inches long, with blunt ends, smooth and of bright orange color. Flesh red, sweet and mild, almost coreless.			
IMPERATOR	1.35	4.00	18.50
Tops medium but strong enough for good bunching. Roots 7 to 8 inches long, have sloping shoulders, are smooth, deep rich orange; tapered to a semi-blunt end. Flesh rich orange color, extending to center of root with indistinct core; fine grained, tender and of fine quality. An excellent variety for market garden and shipping.			

CAULIFLOWER

	oz.
CHICAGO SNOWBALL	3.00
For early outdoor planting and forcing, as well as for late sowing for the fall crop this variety is standard. A well grown head measures 9 to 10 inches across with depth in proportion, and a perfectly white core.	
DRY WEATHER	3.30
This sort is grown to provide, as far as possible, against hot, dry-weather contingencies of crop failure. It is a very sure header, heads larger than Snowball, and is snow-white, second early.	

CELERY

	oz.	$\frac{1}{4}$ lb.
CELERIAC, LARGE SMOOTH PRAGUE (120 days).....	.65	1.70
Excels in quality, size and appearance. A main crop variety nearly globe-shape and almost twice the size of Erfurt		

HYBRID SWEET CORN

	1 lb.	1 pk.	1 bu.
		$12\frac{1}{2}$	50
GOLDEN CROSS BANTAM (84 days).....	.55	4.75	18.50
A bright yellow 12 rowed corn with 8 in ears borne well up on a sturdy stalk. Fully equal in quality to Golden Bantam, maturing about 6 days later and 2 to 3 times as productive. Very resistant to Stewarts Disease.			
HYBRID BANTAM EVERGREEN (80 days).....	.55	5.00	19.00
Stalk 6 to 7 ft. Ear $9-9\frac{1}{2}$ in. 14-rowed with deep rich yellow kernels, tender sweet end well flavored. Earlier, more productive, more uniform and far better in every way than open pollinated Bantam Evergreen.

HYBRID SWEET CORN (Continued)

	lb.	pk.	bu.
	1	12½	50
HYBRID GOLDEN HUMMER (60 days).....	.45	4.00	15.50

Earliest of the hybrids. Like the open pollinated, but more productive, more uniform and has a higher sugar content.

TENDER GOLD (72 days).....	.45	4.00	15.50
----------------------------	-----	------	-------

A very fine corn of outstanding quality introduced after years of research. Four days earlier than Golden Bantam and generally twice as productive, the attractive slender, closely set, of white color, good quality, but market.

OTHER HYBRIDS ON REQUEST.

SWEET CORN

GOLDEN BANTAM (78 days)35	2.50	8.25
-------------------------------	-----	------	------

Plant: Small (4 to 5 feet) suckers freely.

Ears: Small, short to medium in length (5 to 7 inches), slender with 12 rows.

Kernels: Very broad, shallow, creamy yellow color, excellent quality.

WONDER BANTAM BARDEN'S (74 days)35	2.60	8.50
--	-----	------	------

This is a cross of Golden Bantam and Early Wonder, an 8-rowed sweet corn and has the sweetness and the color of the old reliable Golden Bantam and all the toothsome qualities of looks and taste but with this welcome improvement that the ears are larger, 8 to 10 inches long and set up higher on a more sturdy stalk, the stalk being from 5 to 6 feet. Ready for the market in 76 days.

GOLDEN GEM35	2.75	9.50
------------------	-----	------	------

An early variety of yellow corn that has a stalk about the size of Golden Bantam, and ears somewhat larger. In this section from 5 to 7 days earlier than Golden Bantam, very good quality.

BANTAM EVERGREEN (75 days)35	2.75	9.50
----------------------------------	-----	------	------

A variety of Golden Bantam crossed with Stowel's Evergreen, a yellow corn of good quality which meets with a great deal of favor in the Chicago area.

WHIPPLE'S EARLY YELLOW (Early to second early) (81 days)35	2.50	8.25
---	-----	------	------

Fair sized plant (5 to 6 feet).

Ears: Medium in size (usually 7 to 8 inches), thick, slightly tapering with from 12 to 16 rows.

Kernels: Medium width, deep, of yellow color, of good quality.

COUNTRY GENTLEMAN (Shoe-peg corn) late (90 days).....	.35	2.75	9.50
---	-----	------	------

Plant: Large (usually from 6½ to 7½ feet high), suckers moderately, silk is very heavy and of red color.

Ears: Large in size, medium in length (from 7 to 8 inches), medium in thickness, tapering with bulge at middle, without row formation.

Kernels: Irregular on cob, very narrow, very deep and slender, closely set, of white color, good quality, but must be picked promptly when ready.

STOWEL'S EVERGREEN (94 days)35	2.75	9.50
------------------------------------	-----	------	------

Plant: Large size (usually from 7 to 8 feet high), with few to no suckers.

Ears: Large in size, medium in length (from 7 to 9 inches), thick, slightly tapering, with from 14 to 20 rows.

Kernels: Narrow to medium in width, closely set, fairly deep of white color, of good quality.

SWEET CORN (Continued)

	lb.	pk.	bu.
	1	1 ½	50
GOLDEN GIANT (Week later than Golden Bantam) (82 days) Plant: Medium size. Ears: Large in size, 18 inches long with 16-18 rows of creamy yellow kernels set fairly deep.	.35	2.50	8.25
GOLDEN HUMMER (60 days) The largest and earliest of the Yellow Sweet Corns and one of the best for market gardeners as well as home gardeners. Ears 6½ to 7 inches, 12-rowed, kernel golden yellow, medium deep, broad and of excellent flavor.	.35	2.75	9.50
EARLY EVERGREEN (83 days) Earlier than Stowel's Evergreen by 8 to 10 days. This variety remains green for a long time. Large ears.	.35	2.75	9.50

CUCUMBERS

	¼ lb.	1 lb.	5 lb.
DAVIS PERFECT (65 days) Plant: Fairly productive, vigorous in growth. Fruit: Long (8 to 10 inches) medium in thickness, taper- ing towards both ends making fruit spindle-shaped, of dark green color, with few very small warts and white spines, smooth, very small seed cavity, firm, fair quality.	.75	2.15	10.00
THE VAUGHAN (72 days) Darker in color than the white spine varieties, uniform in size and shape, very good variety for outside cukes.	.95	2.75	13.50
IMPROVED WHITE SPINE (62 days) Plant: Very productive, moderately vigorous in growth. Fruit: Short (averaging from 6 to 7 inches long at table stage), thick, round ended with but little taper, of light green color with white spines running about a third of the length from blossom end towards stem end, with few very small warts and white spines, large seed cavity, firm, fairly crisp, of good quality.	.75	2.15	10.00
IMPROVED LONG GREEN (Late) (68 days) Plant: Productive, very vigorous in growth. Fruit: Very long (from 10 to 12 inches), medium in thick- ness, straight, slightly tapering towards the stem end, of medium to dark yellowish green color, with faint stripes, very large prominent warts making a rough surface, black spines, uniformly distributed, small seed cavity. (This is the variety that is widely grown in the Chicago area for yellow cukes.)	.95	2.75	13.50
CHICAGO WESTERFIELD PICKLE (Early) (58 days) Plant: Productive, but lacks vigor in growth. Fruit: Short, slender, slightly tapering, medium green color, with black spines and many large prominent warts.	.70	2.25	10.50
QUICK GROW (48 days) A pickle similar to "Chicago Westerfield" in size and shape, but some earlier. Used a great deal in the Chicago area.	.70	2.25	10.50
SNOW'S FANCY PICKLING (56 days) A selection of the "Chicago Pickle" shorter when ripe than "Chicago Pickle", broad at stem and tapering at tip.	.70	2.25	10.50
GREEN PROLIFIC or BOSTON PICKLING (58 days) Smooth, symmetrical pickle, very early and productive.	.70	2.25	10.50

FOR SALE BY

LAKE-COOK FARM SUPPLY CO.

EGG PLANT

	oz.	¼ lb.	lb.
BLACK BEAUTY (90 days)45	1.25	
Early and nearly as large as New York purple. Fruit dark purple. Holds its color for a long time.			
IMPROVED N. Y. PURPLE (93 days)45	1.25	
The favorite variety, spineless. Plant large and producing four to six large oval fruits of dark purple color.			

KALE OR BORECOLE

	oz.	¼ lb.	lb.
DWARF GREEN CURLED (55 days)30	.75	2.20
Very hardy variety, about 1 to 1½ feet high, spreading growth, finely curled, long leaves. Can be used as a vegetable or for garnishing.			

KOHLRABI

	oz.	¼ lb.	lb.
EARLY WHITE VIENNA (60 days)55	1.75	5.50
An early sort that grows rapidly. The foliage is small and the bulbs round and white, with fine-grained white flesh that is remarkably tender.			
EARLY PURPLE VIENNA (60 days)55	1.80	5.50
Similar to Early White Vienna except a bluish purple in color.			

LEEK

LARGE MUSSELBURG	1.00	3.00	9.00
The large variety, often three inches in diameter and becoming very white and tender.			

LETTUCE

VAUGHAN'S ALL SEASON (80 days)20	.60	1.80
Heads large, solid, leaves grayish green, never spotted or brown—broad and thick. This variety is slow to run to seed.			
BLACK SEEDED SIMPSON (46 days)20	.40	1.10
Forms large, loose, yellowish-green leaves, crumpled and frilled. Exceedingly tender and crisp. Very popular home garden variety as it is very early.			

LETTUCE (Cabbage or Head Varieties)

PRIZEHEAD (Early) (45 days)25	.50	1.50
Desirable variety for the home-garden as it is decidedly crisp and of good flavor, forming large heads of blistered, crumpled leaves.			

MUSKMELON

	oz.	¼ lb.	lb.
IMPROVED MILWAUKEE MARKET (87 days)25	.60	1.80
Plant: Vigorous in growth, somewhat susceptible to disease. Fruit: Medium in size (4½ to 5½ pounds), nearly round, light green color, lightly ribbed, firm, holds up well. Flesh: Of deep salmon color, thick, soft, juicy, fibrous, very sweet, extremely high quality.			
HONEY ROCK or SUGAR ROCK (85 days)25	.60	1.80
Plant: Vigorous in growth. Fruit: Medium sized, not ribbed, oval in shape. Flesh: Orange colored and thick. Sweet with a distinctive flavor.			
HEARTS OF GOLD or IMPROVED HOODOO (90 days)30	.80	2.50
Plant: Vigorous, resistant to blight or rust, hardy. Fruit: Small to medium in size (2 to 3 pounds), round, green color. Flesh: Deep orange color, very thick, firm and sweet.			
YELLOW OSAGE (92 days)25	.60	1.75

MUSKMELON (Continued)

	oz.	$\frac{1}{4}$ lb.	lb.
HONEY DEW (110 days)30	.65	2.00
Plant: Fairly vigorous in growth.			
FRUIT: Slightly oval, 6 to 8 inches in diameter, and weighs 6 to 8 pounds; the skin is smooth and when ripe is creamy yellow in color.			
Flesh: Light emerald green, fine grain and a very sweet, sugary flavor.			
BENDER'S SURPRISE (Early to second early) (90 days)25	.60	1.80
Plant: Fairly vigorous in growth, resistant to diseases.			
Fruit: Large (6 to 8 lbs.) though many will weigh from 8 to 10 lbs., nearly round, light grayish green color, slightly ribbed, coarse netting, large scar at blossom end, very firm, holds up very well.			
Flesh: Deep orange color, very thick, firm, little fibre, sweet, of high quality.			
ROCKYFORD SELECT (Second early) (96 days)35	.60	1.80
Plant: Lacks vigor.			
Fruit: Small to medium (1 to 2 lbs.), round to somewhat oblong, slightly ribbed, firm, holds up very well.			
Flesh: Of green color with very faint lining of pink, thick, firm, very little fibre, very sweet, of high flavor.			
HALE'S BEST (83 days)25	.60	1.80
Plant: Fairly vigorous.			
Fruit: Oval in shape, about 8 by $4\frac{1}{2}$ inches, with heavy netting and fairly prominent ribs.			
Flesh: Salmon color and of exceptional thickness.			

WATERMELON

	oz.	$\frac{1}{4}$ lb.	lb.
TOM WATSON (92 days)15	.30	.80
One of the best shipping melons. The fruits measure 18 to 24 inches long and 10 to 14 inches in diameter, weighing 50 to 60 pounds each. The delicious deep red flesh extends close to the rind, which is dark green and very strong.			
NEW WONDER (87 days)15	.30	.80
Similar to Kleckley's in shape, but larger and has harder rind.			
STONE MOUNTAIN (88 days)15	.30	.80
A very large, medium dark green, round melon of excellent quality. Flesh highly colored, very solid with fewer seeds than most watermelons. Has gained a well deserved popularity in the South where the fruits frequently attain a weight of 60 to 80 pounds. The rind is tough enough to stand handling for nearby markets but will not stand long distance shipping. Edible in 88 days.			
KLECKLEY SWEET (88 days)15	.30	.80
One of the best melons for home use or near-by markets. The rind is unusually thin, and the beautiful bright scarlet flesh ripens close up to it. It is oblong in form and has glossy dark green skin. The flesh is crisp and sugary, without a sign of stringiness. The melons average 18 to 20 in. in length by 10 to 12 in. in diameter.			
SWEETHEART (88 days)15	.30	.80
A good shipping melon and very popular in the markets. The fruits are large, heavy, of oval to round form, with very pale green skin distinctly mottled with a darker shade. Flesh solid, deep red.			

MUSTARD

	$\frac{1}{4}$ lb.	1 lb.
GIANT SOUTHERN CURLED30	.80
A vigorous-growing hardy variety, forming a large mass of curled and ruffled leaves.		

BE SURE TO FERTILIZE

WE have advocated fertilizing for some time because it assured a bigger yield, improved quality and consequently a lower growing cost and a higher selling price. This recommendation was intended to help you increase your earnings.

Today we repeat that recommendation for the same reasons and another one . . . **THE NATION NEEDS THE EXTRA YIELDS TO FURTHER THE WAR EFFORT!** SO, be sure you fertilize.

It is too early to make specific recommendations as this catalog goes to press. Conditions are changing swiftly from day to day. But this recommendation we can make: Choose Swift's Red Steer Fertilizer for every crop you plant.

Figure up your needs early. Delivery will be more of a problem as the season advances. Stop in or get in touch with us by phone or mail. You'll find us well posted, ready and willing to counsel with you on fertilizer matters. We are prepared to serve your needs for

SWIFT'S

FERTILIZER

Lake-Cook Farm Supply Co.

ONIONS

SOUTHPORT YELLOW GLOBE (Eastern grown) (110 days)	1 lb.	5 lb.
Bulb: Large sized, deep globe-shaped, slightly tapering, small neck, cures well, of bright yellow color, good keeper, of excellent quality	5.00	23.50
SWEET SPANISH (Riverside) (110 days)	9.50	45.00
Grows larger than the American Prizetaker, and does not produce the "stiffnecks" as is usual in the Spanish type.		
YELLOW GLOBE DANVERS (Early to second early) (110 days)	5.00	23.50
Bulb: Medium to large-sized, slightly flattened, globe-shaped, slender neck, cures well, of yellow color, very good keeper of good quality.		
RIVERSIDE WHITE SPANISH (110 days)	8.25	40.00
Largest of the Spanish type. It is unequaled for the production of tender, mild green onions for table use, and if grown to maturity produces a large white bulb of remarkable keeping qualities.		
WHITE BUNCHING		
A European onion for early spring and summer bunching.	10 lb.	100 lb.
JAPANESE or EBENEZER (100 days)	40.00	375.00
Used mostly for growing sets, and one of the best keeping onions on the market. Does not run to seed readily		
Bulbs 2 to 3 inches, deep flat in shape, deep yellow, very firm with thick skin.		
WHITE PORTUGAL (95 days)		
This is the best sort to sow for onion sets or for pickling. When sown thickly for either it makes a small, round, hard bulb.		
AUSTRALIAN BROWN	40.00	375.00
Bulbs 2 to 3 inches, clear amber brown, deep, flat with white flesh, flavored very strong.		

PARSLEY

CHAMPION MOSS CURLED (Early)	¼ lb.	lb.
Plant: Small upright, compact, vigorous in growth.	.45	1.25
Leaves: Large, very finely cut, closely curled, strong stem, very dark green.		
HAMBURG ROOTED (Late)	.45	1.25
Plant: Large, upright, slightly spreading, vigorous in growth.		
Leaves: Large in size, deeply cut, flat, not curled, strong stem, dark green.		
Root: Small in size, short, thick, round, of white color.		

PARSNIPS

HOLLOW CROWN	¼ lb.	lb.
Root: Long, white, smooth, tender, sugary and of the most excellent flavor. Very hardy and will keep through the winter without protection.	.45	1.35
IMPROVED GUERNSEY (Second early)	.45	1.35
Root: Large sized, very long (8 to 15 inches), fleshy, about 2½ to 3 inches in diameter at top, skin smooth, of white color, good quality, tender, and sweet.		
WHITE QUEEN	.45	1.35

PEAS

ALASKA (Very early) (57 days)	1 lb.	pk.	bu.
Plant: Half dwarf in growth (2 to 2½ feet), slender vines, fine foliage, very light green color. Small pods.	14	56	
LAXATONIAN (62 days)	.40	2.75	9.75
Plant: Small (15 to 18 inches), heavy vine and foliage, of dark green color.			
Pods: Large to very large in size (3½ to 4 inches), broad, curving slightly, dark green color (6 to 8 peas in each pod), peas large, light green color, very good quality.	.40	3.50	12.00

22 WE PAID 15½% PATRONAGE DIVIDENDS ON PETROLEUM PRODUCTS

PEAS (Continued)

	lb.	pk.	bu.
		14	56
NOTT'S EXCELSIOR (58 days)40	3.00	10.25
Plant: About 15 inches high, vigorous and very prolific. good size, tender and delicious.			
AMERICAN WONDER (Extra Early) (60 days)40	3.00	10.25
Plant: Dwarf vines 10 to 12 inches high.			
SUGAR OR EDIBLE POD (72 days)			
Large edible pods 4 to 4½ inches in length and 1½ inches broad. Vine grows to a height of 48 inches.			
PREMIUM GEM (Extra Early) (58 days)40	3.00	10.25
Pods: Firm and well filled, 3 inches long, wrinkled.			
LAXTON'S PROGRESS (Early) (62 days)40	3.50	12.00
Pods: Large (4 to 4½ inches), broad, slightly curved, 8 peas to pod, dark green color, of very good quality.			
LITTLE MARVEL (60 days)40	3.00	10.25
Plant: Vines 18 inches long, very productive and hardy. Pods: The most satisfactory home garden pea with dark green, well filled pods.			

PEPPERS

Varieties and Prices on request.

PUMPKINS

	oz.	¼ lb.	lb.
LARGE CONNECTICUT FIELD or BIG TOM (Late)15	.30	.65
Plant: Vigorous vine. Fruit: Large and usually about 15 inches in diameter, (about 25 pounds in weight) somewhat variable in shape, skin smooth, orange yellow color, shell thin, hard, good keeper.			
SMALL SUGAR PIE (Early)20	.40	1.00
Plant: Vigorous vine. Fruit: Small (8 to 10 inches), slightly ribbed, deep orange yellow color, shell hard, good keeper. Flesh: Thick, deep yellow color, sweet, good quality.			

POPCORN

	lb.
JAPANESE HULL LESS35
SOUTH AMERICAN25

RADISH

	oz.	lb.	10 lb.
SCARLET GLOBE (Select) (Early) (20 days)20	.90	7.75
Plant: Small to medium sized. Roots: Medium in size, globe to olive shaped, (¾ to 1¼ inches) bright scarlet color, mild, tender, crisp, solid, good quality.			
SPARKLER WHITE TIPPED (Early) (20 days)20	.80	6.75
Plant: Small to medium. Roots: Small to medium, flattened to globular shape (about 1x1 inch), of crimson color, gradually shad- ing to a distinct white tip, mild, tender, crisp, solid, good quality.			
WHITE ICICLE (Early to mid-season) (25 days)20	.80	6.75
Plant: Medium to large. Roots: Medium to large in size, long (¾ inch in diameter, by 4 to 6 inches long), cylindrical, round, white color, tender, crisp, excellent quality.			
ROUND BLACK SPANISH (Winter variety) (58 days)		¼ lb	1 lb.
Black skin and white flesh.		.40	1.25
LONG BLACK SPANISH40	1.25

RUTABAGA

	¼ lb.	1 lb.	5 lb.
BANGHOLM55	1.65	8.00
Yellow flesh, purple top. This variety has excellent table quality.			
AMERICAN PURPLE TOP IMPROVED (Late)55	1.65	8.00
Plant: Large. Root: Large, globular, short neck, smooth light yellow, purple top. Flesh: Yellow, tender, sweet, very good quality.			

Now is the time to keep your herd's production at a high level. Increased demand and favorable ratio between feed cost and milk price makes it good business to get the most out of your cows. Immediate increase in production can only be obtained through better feeding and management. This is being done successfully by many dairymen through the use of BLUE SEAL DAIRY BALANCER.

Blue Seal has all the necessary proteins, vitamins, and minerals to give your cow a balanced ration. When the ration is properly balanced, it means that your cows are producing at maximum efficiency and that your profit will be proportionately greater.

August and September are the "danger" months in milk production. A well balanced and palatable grain ration is the best protection you can give your cows against heat, flies, and short pastures.

Lost production at this time can not be regained later.

FOR SALE BY

LAKE-COOK FARM SUPPLY CO.

SALSIFY

MAMMOTH SANDWICH ISLAND
The roots are of superior quality and most delicious flavor.

oz. ¼ lb. lb.
.30 .65 1.90

SPINACH

KING OF DENMARK (Antvorskov) (Second early) (44 days)
Plant: Large size, spreading in growth, stands longer without shooting to seed than any other variety.

lb. 10 100
lbs. lbs.
9.25 80.00

Leaves: Large in size, rounded, usually smooth, moderately thick, dark green color, very long petioles.

OLD DOMINION (40 days)

8.50 70.00

The same as Virginia Blight-Resistant in type and quality. Will eventually take the place of Virginia because of its long standing qualities which permits early spring planting.

VICTORIA (Late) (50 days)

7.50 65.00

Plant: Small sized, compact, low, spreading, forming a flat rosette close to the ground, quite hardy, stands hot weather fairly well, shoots to seed rather slowly.

Leaves: Small in size, usually blunt or rounded at ends, much wrinkled, crumpled and savoyed, especially at base, very thick, dark green color very short petioles.

NEW LONG STANDING BLOOMSDALE (45 days)

7.50 65.00

Darker green and more heavily crumpled than Bloomsdale, and will stand ten days longer before bolting to seed.

VIRGINIA SAVOY BLIGHT RESISTANT (39 days)

7.50 65.00

Is a cross of Bloomsdale, resists the mosaic, blight, or "yellows," is vigorous and of fine type, goes to seed quickly when grown in spring, more suitable for fall planting.

GIANT THICK LEAVED (Second early) (42 days)

7.50 65.00

Plant: Largest spinach under cultivation, grows rapidly.

Leaves: Medium green, large and rounded, slightly crumpled, succulent and tender.

NEW ZEALAND SPINACH (60 days)

Furnishes delightful greens all summer and up to cold weather.

SWISS CHARD

SILVER (55 days)

oz. ¼ lb. lb.
.20 .50 1.40

This robust growing variety is often referred to as the Spinach Beet, but is grown for its leaf, not for its root.

CUT AND COME AGAIN (45 days)

.20 .50 1.40

This vegetable yields a constant crop from July until winter.

LUCULLUS (55 days)

.20 .50 1.40

A new moss curled sort. Very large leaves. The mid ribs are very broad and form a good substitute for asparagus in the summer months.

SQUASH

BLUE HUBBARD (110 days)

oz. ¼ lb. lb.
.30 .60 1.75

Similar to Green Hubbard, but bluish gray in color, better quality, better keeper.

CHICAGO WARTED HUBBARD (100 days)

.25 .55 1.60

Fruit: Large, squash slightly oblong, surface rough, covered with warts, dark green color, shell thick, rind hard, good keeper.

TABLE QUEEN "DES MOINES" ACORN (Early winter) (55 days)

.20 .50 1.40

Fruit: (5 to 6 inches long), (4 to 4½ inches in diameter), dark green color, deeply ribbed, smooth skin.

Flesh: Moderately thick, light orange color, good quality.

YELLOW SUMMER CROOKNECK (56 days)

.20 .40 1.25

Fruit: Large, (15 to 20 inches long) warted, of rich yellow color, crooked neck, good quality.

GIANT STRAIGHTNECK (55 days)

.25 .45 1.00

A selection of the crookneck except having a straight neck.

ITALIAN MARROW (Early summer) (60 days)25	.50	1.40
Fruit: Medium in size, cylindrical, dark green, striped with light green, good quality.			
EARLY WHITE BUSH (55 days)20	.40	1.15
A flat, scallop shaped, white squash which should be used while young.			

TOMATOES

	oz.	¼ lb.	lb.
BEAUTY (Mid-season pink) (84 days)40	1.35	4.00
Fruit: Large, uniform, smooth, purplish pink skin, flesh light pink.			
BONNY BEST (Second early) (75 days)35	1.15	3.50
Fruit: Small to medium in size, red color, globular in shape, very smooth, very good quality.			
MARGLOBE (Mid-season red globe, blight and nailhead resistant) (80 days)40	1.35	4.00
A little later than "Bonnie Best."			
Fruit: Medium to large in size, red color, smooth, solid, thick walls, very good quality.			
EARLY BALTIMORE50	1.65	5.00
Illinois University selection of Marglobe, thriving on all soils, smaller fruit, solid, bright color, heavier yielder.			
JOHN BAER (Mid-season potato-leaved red) (73 days)35	1.15	3.50
Fruit: Early red to scarlet type, not as early as Earliana, yield heavier, and more uniform fruit.			
EARLIANA SELECT (Earliest red) (65 days)45	1.50	4.50
Fruit: Medium size, red, flattened to nearly round in shape.			
CHALK'S JEWEL (An early red) (76 days)35	1.15	3.50
Fruit: Small to medium in size, dark red, nearly globular in shape, slightly flattened, very smooth, small shallow stem cavity, good quality.			
EARLY DETROIT (Early pink) (82 days)40	1.35	4.00
Fruit: Round and nearly globe shaped, firm and purplish pink in color.			
BREAK O'DAY (71 days)40	1.35	4.00
A wilt resistant tomato that is nearly as early as Earliana and as productive as Marglobe. Its fruits are large, smooth, red and globular.			
LIVINGSTON GLOBE (82 days)45	1.50	4.50
A large, smooth, purple-fruited variety of good quality.			
GREATER BALTIMORE (83 days)35	1.15	3.50
An excellent main crop variety, producing large, solid, smooth fruit of a brilliant red color.			
RED PLUM (73 days)50	1.60
Fruit is bright red and plum shaped.			
YELLOW PLUM (75 days)50	1.60
Fruit is deep yellow and plum shaped.			
GROUND CHERRY (85 days)50	1.60
The small fruit is enclosed in a husk. It is very sweet; prized for eating, preserving and making pies.			
PRITCHARD (76 days)45	1.50	4.50
Wilt resistant. Fruits large, smooth, globular, solid with thick walls and cross sections. Color, deep scarlet.			

TURNIP

	¼ lb.	lb.	5 lb.
PURPLE TOP WHITE GLOBE (Mid-season) (55 days)25	.70	3.25
Plant: Large.			
Leaves: Broad, little divided.			
Root: Large, 3 inches in diameter, globe-shaped, white color with purple or red top, which grows above ground.			
Flesh: White, sweet, very good quality.

PYROCIDE DUST

Pyrocide dust is a non-poisonous dust and through tests run here in this county, it has proven to be very effective for controlling of potato leaf hoppers, beetles, and cucumber hoppers, and we recommend this dust very highly. Due to our unusually large volume in these dusts, we are in position to furnish them at very low prices and with the vegetable market selling at much higher prices than previous years, we heartily recommend that you control the insects. Profits are only made on quality crops that are marketed and not on what the insects eat. We suggest that you give thought to your requirements today and let us know what you will need.

ROTONNE DUST

Rotonne dust is a non-poisonous dust used for the control of sucking and chewing insects. It has been found to be very effective and is low in price. This is kept in stock at all times.

INSECTICIDES

A COMPLETE LINE OF COMMERCIAL INSECTICIDES

Arsenate of lead	Derrisol	Nico Fume
Black Arrow Dust	Evergreen	Nikoteen

GUARANTEE—The Lake-Cook Farm Supply Company gives no warranty, express or implied, as to description, quality, productiveness or any other matter of the seeds, it sells, and will not be responsible for the crop. We exercise, however, the greatest care to fill your orders with the highest quality possible, as it is our aim to give our customers fullest satisfaction.

Prices as listed are of the time that this catalog goes to press. We reserve the right to change them at any future date should the market make it advisable that we do so. We are prepared at all times to meet legitimate competition on garden seed prices.

BLUE SEAL CHICK STARTER

SAVE MONEY—ORDER EARLY

Baby chicks thrive on Blue Seal Chick Starter. Last year, sales of Blue Seal doubled. Demand this year may outrun capacity. Raw material shortages such as meat scraps, fish meal, milk by-products and vitamin carriers are already in evidence. So place your order now for Blue Seal Chick Starter. Be assured of pre-war high quality. Delivery will be made when you get your chicks. See your Blue Seal Salesman today about the special future order plan.
